

Optimal **Integrated** **Security** Solutions

Discover new opportunities for efficiency and increase the safety of your physical and digital assets with seamless integrated environments that function harmoniously to meet the security demands of your organization.

OVERVIEW

Integrated security systems for your business

Face physical threats with a sophisticated, integrated security solution.

Bring all aspects of your organization's security together by implementing a holistic system that works in harmony to meet the unique needs of your business, regardless of size. Instead of using individual legacy elements that may jeopardize the security of your site and data, invest in a designed integrated solution that will create a safer, more intuitive environment, mitigating potential vulnerabilities and maximizing performance efficiency.

BENEFITS

Top benefits of adopting integrated electronic security systems

An integrated approach offers a more comprehensive stance to security that is less susceptible and better able to respond to incidents.

○ Efficiency

Centralized management and added protection will allow institutions of any size to flourish by highlighting bottlenecks, deterring crime, and identifying safety hazards before they become emergencies.

○ Real-time monitoring

An integrated security system and improved data management are valuable ways to prevent vandalism and minimize damage. When IP cameras are integrated, license plates, faces, and other important information can be identified to help you respond more appropriately to any situation.

○ Increased protection

Protecting employees and visitors requires a deliberate convergence of physical and logical security. Access control and visitor management systems (physical security) keeps them safe by allowing only authorized individuals into the building. Logical security and protocols can protect their computers and data from unauthorized access.

○ Faster return on investment (ROI)

An integrated security system is easier to maintain and keep updated. When all security components are unified, fewer human and technological resources are needed, resulting in a faster ROI.

○ Securing your data

An integral part of securing your information is the unification of physical and logical security solutions. This simplifies the manageability of your security infrastructure, elevates visibility, prevents security breaches, and offers a platform to manage the response and recovery after an incident occurs.

○ Peace of mind

The appropriate integrated security system can take a lot of stress off of you and give you peace of mind.

SOLUTIONS

Integrated solutions

Managing disparate solutions can limit your ability to protect your business. Delayed notifications, discrepant data, poor monitoring, multiple and heterogeneous sources of information, and uncoordinated operations can be fatal if your organization is affected by a life-threatening situation.

These are some of the technologies we can integrate for your enterprise to stay safe.

| **Access** control

| **Video** surveillance

| **Intrusion** detection

| **Visitor** management

| **Managed** access control

| **Managed** video surveillance

| **Physical** security

| **Situational** awareness

| **Cloud-based** security

Unparalleled **harmony**

You deserve a holistic, coordinated, and reliable integrated security solution.

WHY US

Security 101 offers the best-in-class integrated security systems for your business.

| **We are experienced security professionals**

Security 101 has the depth of experience to design, install, and maintain a seamless integrated electronic security system that is unique to your security needs.

| **Our technologies are effective and sophisticated**

Knowing that your integrated security system consists of best-in-class technologies, serviced by certified and experienced technicians, is foundational to our Security 101 approach.

| **We are fanatical about customer service**

We take customer care seriously. Our priority is to provide you with ongoing support and assistance to help you maintain the integrity and security of your organization.

| **800.261.2041**
