

BUILT FOR SECURITY-CRITICAL SITES

# Audio Visual Solutions for Modern Security Environments

End-to-end AV integration for collaboration spaces, command centers, training and mission-critical environments, aligned with Security 101 standards.

Modern AV systems are essential to how teams communicate and how security and facilities teams operate. As a Security 101 company, AV-Worx extends our ability to deliver integrated solutions where AV and physical security support the same mission.

- | **AV that works in the real world:** clearer communication and simpler room control across collaboration, training, and command environments.
- | **Built to align with Security 101:** enterprise-ready AV that supports secure operations where AV and physical security intersect.

*Reliable, easy-to-operate systems that improve day-to-day communication and strengthen decision-making during critical events.*

## AV Capabilities at a Glance

### Meeting and collaboration spaces

- **Conference Rooms:** Integrated AV for consistent, high-quality collaboration
- **Huddle Rooms:** Simple, reliable conferencing for small spaces
- **Board Rooms:** Premium AV, control, and display solutions for executive environments
- **Breakout Rooms:** Flexible AV that adapts to dynamic meeting needs
- **Multipurpose Rooms:** Scalable systems that support changing room functions

### Command, control, and emergency operations

- **Command & Control Rooms:** Optimized visualization, audio, and control for decision-making
- **Emergency Operations Centers (EOC):** Resilient AV for coordination during incidents
- **Real Time Crime Centers (RTCC):** Situational awareness and communications enablement
- **Fusion Centers:** Secure, multi-agency collaboration environments

### Training, learning and presentation environments

- **Classrooms / Training Rooms:** Modern instruction tools and interactive AV
- **Training Centers:** Repeatable, consistent AV for ongoing programs
- **Auditoriums / Lecture Halls:** Large-format audio, display/projection, and control systems

### Public-facing spaces and experiences

- **Reception Areas / Lobbies:** Digital signage and AV that supports brand experience
- **Museum & Digital Experience Centers:** Immersive AV environments for storytelling and engagement

### Mission-critical visualization solutions

- **Advanced Visualization:** Large-scale display ecosystems and operator visualization
- **Mission Critical Solutions:** Robust architectures designed for reliability under pressure

## Where AV and Security Converge

### Clearer coordination, better visibility, and more effective operations in mission-critical environments.

- | **Aligned with Security 101 standards:** AV deployments that fit within broader facility and security requirements.
- | **One team, coordinated execution:** stronger outcomes when AV and physical security projects overlap across spaces and sites.

## End to End Delivery

### Design | Engineer | Deploy | Integrate | Commission | Support

We manage the full lifecycle to ensure systems are reliable, easy to operate, and consistent across rooms and locations.

### What We Deliver

- | Video conferencing and collaboration
- | Displays, projection, and video walls
- | Audio reinforcement and speech intelligibility
- | Room control systems and usability standardization
- | Digital signage and messaging
- | Visualization for command environments
