Security101

FROM REACTIVE TO READY

Proactive
Security

See threats *before* they happen.

Security 101 helps organizations prevent threats—not just respond to them—using AI-powered systems that integrate video, access control, environmental sensors, and more.

AI-Powered Protection, Where It Matters Most

People & Vehicle Alerts
AI-triggered detection, virtual fencing, trailers

Perimeter Protection
LPR, pre-screening, gates, access control planning

Environmental Sensors
Vape detection, water leak alerts, temp & air quality

Weapons Detection
Real-time identification via video analytics

Industries We Support

- EDUCATION
- HEALTHCARE
- MANUFACTURING
- RETAIL
- PROPERTY MANAGEMENT
- GOVERNMENT

The Role of AI

AI connects your systems, analyzes patterns, and provides alerts before incidents happen. **Reduce false positives, monitor intelligently, and stay one step ahead.**

Benefits of AI-Driven Security

| Reduce risk and downtime | Lower operating costs | Strengthen compliance | Eliminate blind spots | Enable faster decision-making |

Ready to **go proactive?**
